

## IMMERSION THERMOWELL

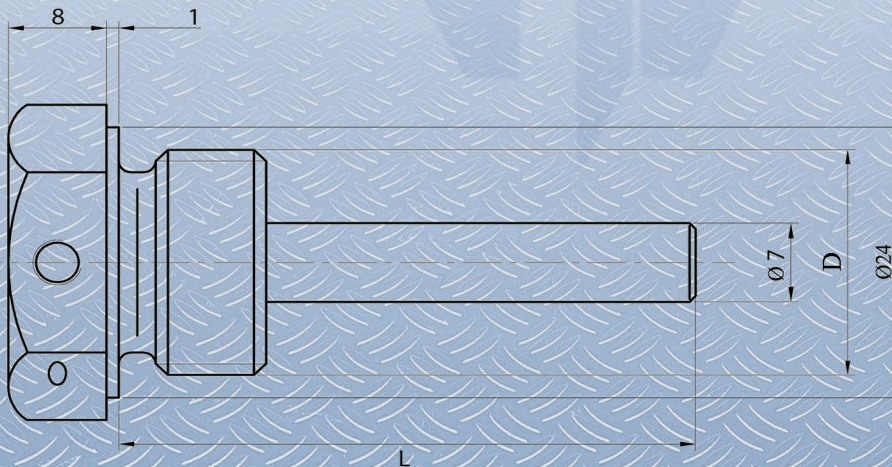

# OG4

We offer **OG4** type thermowell in immersion length ranging from **35** to **85** mm. The thermowell allows to mount temperature sensors in pipelines where a tightness during measurement is required. Additional feature of the thermowell is to keep the sensor fixed and seal it. An immersion length can be adapted to customer's need.

### TECHNICAL DATA

- |                                |                                      |
|--------------------------------|--------------------------------------|
| • Material                     | <b>brass (M058), others (I.457I)</b> |
| • Immersion length L [mm]      | <b>35 - 85 (step every 5mm)</b>      |
| • Process thread D             | <b>G 1/2"; M20x1,5</b>               |
| • Allowable operating pressure | <b>2,5 MPa</b>                       |
| • Internal diameter            | <b>ø 5,3 mm</b>                      |
| • Wrench size                  | <b>SW 24</b>                         |

### DIMENSIONS

### ORDERING

When ordering please give the OG thermowell type, material, immersion length L and process thread D.

**Example:** **OG4/ M058/ 60 mm/ G 1/2"**
